

Stunning Supermoon, April 2020.

Stunning Supermoon, April 2020.

Perfect silver sphere,

Supersized & bright,

Boldly dazzles in the night time,

Sunlight when there is none.

Orbits Earth in cycles, a circle round & round,

Can see but never touch as it circles round the ground,

Circles round the ground...

Kept apart by distance, isolation in extreme;

Pulled together by attraction, forever closely linked.

Beauty in the heavens, seems remote & out of reach;

But every day we feel it, influence we cannot breach.

Waxing or waning,

More or less to see,

Constant ever changing.

Dark side hid from view, even when it's new;

Full moon, Supermoon,

Always shining through.
