

## **Radiant glow, bright blue halo**

Radiant glow, bright blue halo.  
Neon blue, ultra-violet,  
A shimmer surround to the buttery round.  
Bigger tonight, more creamy in tone,  
a depth of true colour, still beaming and round.  
A 3D sphere, so it would appear,  
Named for a flower from 'not over here'.  
The American phlox, not pink but blue,  
gives supermoon powers 2 humble moon rocks.  
Tonight 4 a time as it rides through the sky,  
brings beauty & light to such a dark night,  
Reflecting the love of warm sun to come.  
As day follows night, so we take flight...
